

TechNova Pvt. Ltd.

IT and Information Security Policy

Fictional company policy document — created for the Agentic Enterprise Employee Assistant capstone.

1. Company Assets

Company laptops, monitors, peripherals, accounts, and other IT assets are provided for authorized business use.

2. Asset Responsibility

- Employees are responsible for taking reasonable care of assigned equipment.
- Employees should report loss, theft, damage, or malfunction promptly to IT Support.

3. Passwords and Access

- Passwords must be kept confidential.
- Employees must not share authentication credentials.
- Access to company systems should only be used for authorized purposes.

4. Device Security

- Employees must use approved security controls and keep company devices updated.
- Sensitive company information should not be stored or transmitted through unauthorized services.

5. IT Support

Employees can raise an IT support request for technical problems, equipment issues, or access problems.

6. Asset Records

The IT asset system is the source of truth for which assets are assigned to an employee. The assistant should use the IT asset tool for employee-specific asset questions.

7. Security Incidents

Suspected phishing, unauthorized access, lost devices, or other security incidents should be reported promptly through the approved IT/security channel.
