Leave Policy

Fictional company policy document — created for the Agentic Enterprise Employee Assistant capstone.

1. Leave Categories

- Casual Leave (CL): intended for short personal needs.
- Earned Leave (EL): intended for planned time away from work.
- Sick Leave (SL): intended for illness or medical recovery.

2. Leave Balance

Leave balances are maintained in the employee system. The balance shown for an employee is the authoritative employee-specific balance for assistant queries.

3. Applying for Leave

- Employees should submit leave requests through the approved employee workflow.
- Planned leave should be requested in advance whenever reasonably possible.
- Leave is subject to manager approval and business requirements.

4. Sick Leave

For extended sickness, employees may be asked to provide supporting documentation according to People Operations requirements.

5. Holidays and Weekends

Company holidays and weekly days off are not deducted as leave when they fall within an approved leave period, subject to the applicable company calendar.

6. Leave Restrictions

Employees should not assume that submitting a request means the leave is approved. The request status must be checked after submission.

7. Assistant Behavior

The assistant may explain this policy using RAG. For a question about an individual's current balance, the assistant must use the employee data tool rather than infer the balance from this document.
